

## ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

---

**Date/Time:** October 18, 2004/ 0730 hrs

**Site Contact(s):** Bob Fiehweg  
**Phone:** 303-966-7403

**Regulatory Contact:** Sean Lieske, WQCD, CDPHE  
**Phone:** 303-692-3505

---

**Purpose of Contact:** Revised Monitoring Plan for B124

---

### Discussion

Early last month, in anticipation of the change in operations at B124, we wrote to the state to ask for a modification to the 2004 monitoring plan. We are currently required to do a minimum of 6 samples per month for total coliforms in the drinking water system. With the reduction in population served from over 5,000 on-site to roughly 150 at B060 and 061, we qualified for reduced monitoring. Sean called today to discuss our request.

He agrees that the reduced service population requires less monitoring – for a population of only 150 people, we would be required to monitor for total coliforms 1 time per month. Currently, we had been conducting weekly samples until the State responded to our request for a monitoring plan amendment. Unfortunately, as Sean explained, there is currently a 4 month backlog in updating the database. He offered to talk with the system administrator to see if our change could be expedited, and he also agreed to talk to the head of the Coliform program to alert them that we would be submitting fewer coliforms results. I offered to prepare this contact record to document their receipt of the letter and the acknowledgement of the needed change to the monitoring plan. We will continue to collect weekly coliforms at B060 and 061 until the database change is formal.
